

Webinar: Easy GUI Development with Candera and Kontron

Webinar Date:

Tuesday, 20th of April, 2021

10:00-11:00 AM (CEST)/17:00-18:00(JAPAN)

<https://cgistudio.at/webinar-20042021/>

The increasing amount of graphical user interfaces (GUIs) has led to a massive growth of HMI development efforts and reduced timelines for all employees involved in the UI/UX process. As this trend continues, an easy GUI development process could significantly improve this development process in terms of complexity as well as time required.

In this Webinar you will experience a full GUI development workflow from first design to final target – without programming a single line of code. This GUI development process will be realized with Candera’s HMI design tool CGI Studio and the AI assisted Smart Importer and Kontron’s Web Panel.

Take-aways for attendees:

- Create brilliant GUIs without the need for programming and professional / community support
- Experience Candera’s AI assisted HMI creation workflow – from first design to final target
- Spend your time on creativity instead of complex processes

Speakers:

Thomas Kaufmann
Sales Manager,
Candera

Sebastian Wieland
Managing director,
Kontron Electronics AG

Patrick Andessner
Software Engineer,
Candera

Based on over 20 years of experience in the embedded software development together with our broad customer base we have created a mature feature-rich and customizable product. In fact, CGI Studio today covers all aspects of automotive GUI development and beyond. Furthermore, we're closely working together with our customers and industry partners to provide solutions for present and future HMI needs.
